includes bibliographical references

## Commercial Fisheries Review

1966

two groups of animals bats and odontocetes toothed whales have independently developed the ability to orient and detect prey by biosonar echolocation this active mechanism of orientation allows these animals to operate under low light conditions biosonar is a conceptual overview of what is known about biosonar in bats and odontocetes chapters are written by bat and odontocetes experts resulting in collaborations that not only examine data on both animals but also compare and contrast mechanisms this book provides a unique insight that will help improve our understanding of biosonar in both animal groups

### *Annual Report*

1985

vol 1 contains the papers and proceedings of the first congress v 2 from the papers and discussions at the second fao world fishing gear congress arranged by the technical staffs of

fishing news international and fishing news v 3 fish finding purse seining and aimed trawling

## Rapports et procès-verbaux des réunions

1984

for the 119 species of marine mammals as well as for some other aquatic animals sound is the primary means of learning about the environment and of communicating navigating and foraging the possibility that human generated noise could harm marine mammals or significantly interfere with their normal activities is an issue of increasing concern noise and its potential impacts have been regulated since the passage of the marine mammal protection act of 1972 public awareness of the issue escalated in 1990s when researchers began using high intensity sound to measure ocean climate changes more recently the stranding of beaked whales in proximity to navy sonar use has again put the issue in the spotlight ocean noise and marine mammals reviews sources of noise in the ocean environment what is known of the responses of marine mammals to acoustic disturbance and what models exist for describing ocean noise and marine mammal responses recommendations are made for future data gathering efforts studies of marine mammal behavior and physiology and modeling efforts necessary to determine what the long and short term impacts of ocean noise on marine mammals

### *Lakeland Boating*

1997

fishing companion for establishing a global positioning system a gps enables anglers to determine their latitude and longitude out of the water and to steer to any particular coordinate within their boat s physical ability without the need for line of sight reference provides place locality comments latitude and longitude information for all australian states and the northern territory includes over 2000 marks forms to enter information on new marks and photos
