Caste in Question

2004-12-08

this important volume provides an alternative perspective on caste it demonstrates that the traditional view of caste as a single hierarchy with brahmins at the top and the untouchable castes at the bottom is no longer valid from politics to gender to economic interaction the contributors reveal how the erstwhile single pure hierarchical order is constantly being questioned and weakened the essays in this volume argue for a different conceptualisation of caste one that would take into account the need for caste assertion and dignity as well as notions of hierarchy the contributors show that while pride in one's caste identity is an important feature of the caste order this is not incompatible with contesting notions of hierarchy caste is now better seen in terms first of discrete identities and then in terms of multiple and contesting hierarchies using contemporary experiences this exciting volume reflects on received wisdom concerning theories of caste and provides an entirely fresh perspective

in this compelling social history william r pinch tackles one of the most important but most neglected fields of the colonial history of india the relation between monasticism and caste the highly original inquiry yields rich insights into the central structure and dynamics of hindu society insights that are not only of scholarly but also of great political significance perhaps no two images are more associated with rural india than the peasant who labors in an oppressive inflexible social structure and the ascetic monk who denounces worldly concerns pinch argues that contrary to these stereotypes north india s monks and peasants have not been passive observers of history they have often been engaged with questions of identity status and hierarchy particularly during the british period pinch s work is especially concerned with the ways each group manipulated the rhetoric of religious devotion and caste to further its own agenda for social reform although their aims may have been quite different ramanandi monastics worked for social equity while peasants agitated for higher social status the strategies employed by these two communities shaped the popular political culture of gangetic north india during and after the struggle for independence from the british

intersected with politics economics and society the author shows how many patronage patterns and processes persisted in altered forms and how the robustness of these structures contributed to the resilience of urban spaces and society in precolonial rajasthan
