scientific information to groups in industry government high schools and universities rea has since become a successful and highly respected publisher of study aids test preps handbooks and reference works rea s test preparation series includes study guides for all academic levels in almost all disciplines research education association publishes test preps for students who have not yet completed high school as well as high school students preparing to enter college students from countries around the world seeking to attend college in the united states will find the assistance they need in rea s publications for college students seeking advanced degrees rea publishes test preps for many major graduate school admission examinations in a wide variety of disciplines including engineering law and medicine students at every level in every field with every ambition can find

what they are looking for among real publications while most test preparation books present practice tests that bear little resemblance to the actual exams real series presents tests that accurately depict the official exams in both degree of difficulty and types of questions real series practice tests are always based upon the most recently administered exams and include every type of question that can be expected on the actual exams real series publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals instructors librarians parents and students our authors are as diverse as the fields represented in the books we publish they are well known in their respective disciplines and serve on the faculties of prestigious high schools colleges and universities throughout the United States and Canada

**Chapter 1 About the SAT II Chemistry Subject Test**

**About This Book** This book provides you with an accurate and complete representation of the SAT II Chemistry Subject Test. Inside you will find a complete course review designed to provide you with the information and strategies needed to do well on the exam as well as six practice tests based on the actual exam. The practice tests contain every type of question that you can expect to appear on the SAT II Chemistry Test. Following each test you will find an answer key with detailed explanations designed to help you master the test material.

**About the Test** Who takes the test and what is it used for? Students planning to attend college take the SAT II Chemistry Subject Test for one of two reasons: 1) because it is an admission requirement of the college or university to which they are applying or 2) to demonstrate proficiency in chemistry. The SAT II Chemistry Exam is designed for students who have taken one year of college preparatory chemistry.

**Who Administers the Test?** The SAT II Chemistry Subject Test is developed by the College Board and administered by Educational Testing Service (ETS). The test development process involves the assistance of educators throughout the country and is designed and implemented to ensure that the content and difficulty level of the test are appropriate.

**When Should the SAT II Chemistry be Taken?** If you are applying to a college that requires subject test scores as part of the admissions process, you should take the SAT II Chemistry Subject Test toward the end of your junior year or at the beginning of your senior year. If your scores are being used only for placement purposes, you may be able to take the test in the spring of your senior year.

**For More Information** Be sure to contact the colleges to which you are applying when and where is the test given. The SAT II Chemistry Subject Test is administered five times a year at many locations throughout the country, mostly high schools.

**To Receive Information on Upcoming Administrations of the Exam** Consult the publication *Taking the SAT II Subject Tests*, which may be obtained from your guidance counselor or by contacting College Board SAT Program, P.O. Box 6200, Princeton, NJ 08541-6200, phone 609-771-7600, website [collegeboard.com](http://collegeboard.com).

**Is There a Registration Fee?** Yes, there is a registration fee to take the SAT II Chemistry. Consult the publication *Taking the SAT II Subject Tests* for information on the fee structure. Financial assistance may be granted in certain situations to find out if you qualify and to register for assistance, contact your academic advisor.

**How to Use This Book** What do I study first? Remember that the SAT II Chemistry Subject Test is designed to test knowledge that has been acquired throughout your education. Therefore, the best way to prepare for the exam is to refresh yourself by thoroughly studying our review material and taking the sample tests provided in this book. They will familiarize you with the types of questions, directions, and format of the SAT II Chemistry Subject Test.

**To Begin Your Studies** Read over the review and the suggestions for test taking. Take one of the practice tests to determine your areas of weakness and then reread the review material focusing on your specific problem areas. The course review includes the information you need to know when taking the exam. Be sure to take the remaining practice tests to further test yourself and become familiar with the format of the SAT II Chemistry Subject Test.

**When Should I Start Studying?** It is never too early to start studying for the SAT II Chemistry Test. The earlier you begin, the more time you will have to sharpen your skills. Do not procrastinate. Cramming is not an effective way to study since it does not allow you the time needed to learn the test material. The sooner you learn the format of the exam, the more comfortable you will be when you take the exam.

**Format of the SAT II Chemistry** The SAT II Chemistry is a one-hour exam consisting of 85 multiple-choice questions. The first part of the exam consists of classification questions. This question type presents a list of statements or questions that you must match up with a group of choices lettered A through E. Each choice may be used once more.

than once or not at all the exam then shifts to relationship analysis questions which you will answer in a specially numbered section of your answer sheet you will have to determine if each of two statements is true or false and if the second statement is a correct explanation of the first the last section is composed strictly of multiple choice questions with choices lettered a through e material tested the following chart summarizes the distribution of topics covered on the sat ii chemistry subject test

topic	percentage	number of questions
atomic molecular structure	25	21 questions
states of matter	15	13 questions
reaction types	14	12 questions
stoichiometry	12	10 questions
equilibrium	7	6 questions
thermodynamics	6	5 questions
descriptive chemistry	13	11 questions
laboratory	8	7 questions

the questions on the sat ii chemistry are also grouped into three larger categories according to how they test your understanding of the subject material

category	definition	approximate percentage of test
1	factual recall demonstrating a knowledge and understanding of important concepts and specific information	20
2	application taking a specific principle and applying it to a practical situation	45
3	integration inferring information and drawing conclusions from particular relationships	35

studying for the sat ii chemistry it is very important to choose the time and place for studying that works best for you some students may set aside a certain number of hours every morning to study while others may choose to study at night before going to sleep other students may study during the day while waiting on line or even while eating lunch only you can determine when and where your study time will be most effective be consistent and use your time wisely work out a study routine and stick to it when you take the practice tests try to make your testing conditions as much like the actual test as possible turn your television and radio off and sit down at a quiet desk or table free from distraction make sure to clock yourself with a timer as you complete each practice test score it and thoroughly review the explanations to the questions you answered incorrectly however do not review too much at any one time concentrate on one problem area at a time by reviewing the questions and explanations and by studying our review until you are confident you completely understand the material keep track of your scores by doing so you will be able to gauge your progress and discover general weaknesses in particular sections you should carefully study the reviews that cover your areas of difficulty as this will build your skills in those areas

test taking tips although you may be unfamiliar with standardized tests such as the sat ii chemistry subject test there are many ways to acquaint yourself with this type of examination and help alleviate your test taking anxieties become comfortable with the format of the exam when you are practicing to take the sat ii chemistry subject test simulate the conditions under which you will be taking the actual test stay calm and pace yourself after simulating the test only a couple of times you will boost your chances of doing well and you will be able to sit down for the actual exam with much more confidence know the directions and format for each section of the test familiarizing yourself with the directions and format of the exam will not only save you time but will also ensure that you are familiar enough with the sat ii chemistry subject test to avoid nervousness and the mistakes caused by being nervous do your scratchwork in the margins of the test booklet you will not be given scrap paper during the exam and you may not perform scratchwork on your answer sheet space is provided in your test booklet to do any necessary work or draw diagrams if you are unsure of an answer guess however if you do guess guess wisely use the process of elimination by going through each answer to a question and ruling out as many of the answer choices as possible by eliminating three answer choices you give yourself a fifty fifty chance of answering correctly since there will only be two choices left from which to make your guess mark your answers in the appropriate spaces on the answer sheet fill in the oval that corresponds to your answer darkly completely and neatly you can change your answer but remember to completely erase your old answer any stray lines or unnecessary marks may cause the machine to score your answer incorrectly when you have finished working on a section you may want to go back and check to make sure your answers correspond to the correct questions marking one answer in the wrong space will throw off the rest of your test whether it is graded by machine or by hand you don t have to answer every question you are not penalized if you do not answer every question the only penalty results from answering a question incorrectly try to use the guessing strategy but if you are truly stumped by a question remember that

you do not have to answer it work quickly and steadily you have a limited amount of time to work on each section so you need to work quickly and steadily avoid focusing on one problem for too long before the test make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test on the night before the test gather together the materials you will need the next day your admission ticket two forms of identification e g driver s license student identification card or current alien registration card two no 2 pencils with erasers directions to the test center a watch if you wish but not one that makes noise as it may disturb other test takers on the day of the test you should wake up early after a good night s rest and have breakfast dress comfortably so that you are not distracted by being too hot or too cold while taking the test also plan to arrive at the test center early this will allow you to collect your thoughts and relax before the test and will also spare you the stress of being late if you arrive after the test begins you will not be admitted to the test center and you will not receive a refund during the test when you arrive at the test center try to find a seat where you feel most comfortable follow all the rules and instructions given by the test supervisor if you do not you risk being dismissed from the test and having your scores canceled once all the test materials are passed out the test instructor will give you directions for filling out your answer sheet fill this sheet out carefully since this information will appear on your score report after the test when you have completed the sat ii chemistry subject test you may hand in your test materials and leave then go home and relax when will i receive my score report and what will it look like you should receive your score report about five weeks after you take the test this report will include your scores percentile ranks and interpretive information

Aquifer Test Solutions 2016-12-01 this book designed as a handbook provides a systematic treatment of analytical solutions describing groundwater flow during aquifer tests the book integrates the majority of known solutions from well hydraulics and subsurface flow theory starting with pioneering work from the early 20th century up to the most recent publications in scientific journals the book includes about 300 transient solutions covering a wide range of aquifer test scenarios and hydrogeological conditions all the solutions have been thoroughly tested and implemented in the multifunctional ansdimat software the book comprises three parts and is supplemented by appendices the first part of the book is dedicated to basic analytical relationships referring to pumping tests with constant discharge rate conceptual models describe confined unconfined confined unconfined inhomogeneous and fracture porous aquifers as well as leaky aquifers and multi layer aquifer systems complicating factors such as flow boundaries aquifer anisotropy non uniform aquifer thickness partial well penetration wellbore storage and skin the effect of capillary forces are also considered the second part focuses on complex pumping test settings and well system configurations analytical solutions are presented for pumping from a horizontal or inclined well constant head tests multi well variable discharge tests simultaneous pumping from adjacent aquifers and dipole flow tests detailed descriptions are given for slug and recovery tests the third part of the book contains algorithms for evaluating hydraulic characteristics using analytical and graphical methods and is supplemented by the ansdimat tool this software includes solutions for some practical engineering hydrogeological problems in particular the assessment of aquifer characteristics by data on groundwater level monitoring and the evaluation of water inflow into open pits the book is supplemented with appendices in which hydrogeologists can find a vast body of useful information including mathematical descriptions of the majority of analytical functions used in the book their plots and possible approximations audience the book is useful for hydrogeologists students engineers and researchers engaged in groundwater flow studies aquifer test analysis environmental geologists and civil engineers experts in water flow numerical modeling and programmers developing software for aquifer tests will find valuable information in this book which can also be used for educational and research purposes
