Linux Network Servers

2006-10-11

authoritative answers to all your linux network server questions specifically for linux administrators tap into linux s impressive capabilities as a network server written by one of the world s leading linux system administration experts linux network servers teaches you step by step all the standard and advanced techniques you need to know to configure and administer a full range of network services from file and printer sharing to email and the hundreds of clear consistent examples illustrate these techniques in detail so you stay on track and accomplish all your goals coverage includes the following installing linux understanding the boot process working with the network interface setting up login services using linux name services configuring a mail server setting up apache server configuring network gateway services configuring desktop configuration server setting up file sharing setting up printer services securing your server troubleshooting the craig hunt linux library the craig hunt linux library provides in depth advanced coverage of the key topics for linux administrators topics include samba system administration dns server administration apache security and sendmail each book in the series is either written by or meticulously reviewed by craig hunt to ensure the highest quality and most complete coverage for networking professionals working specifically in linux environments

Database and Expert Systems Applications

2003-07-31

the database and expert systems applications dexa conferences bring together researchers and practitioners from all over the world to exchange ideas experiences and opinions in a friendly and stimulating environment the papers are at once a record of what has been achieved and the first steps towards shaping the future of information systems dexa covers a broad field and all aspects of database knowledge base and related technologies and their applications are represented once again there were a good number of submissions 241 papers were submitted and of these the programme committee selected 103 to be presented dexa 99 took place in florence and was the tenth conference in the series following events in vienna berlin valencia prague athens london zurich toulouse and vienna the decade has seen many developments in the areas covered by dexa developments in which dexa has played its part i would like to express thanks to all the institutions which have actively supported and made possible this conference namely university of florence italy idg cnr italy faw university of linz austria austrian computer society dexa association in addition we must thank all the people who have

contributed their time and effort to make the conference possible special thanks go to maria schweikert technical university of vienna m neubauer and g wagner faw university of linz we must also thank all the members of the programme committee whose careful reviews are important to the quality of the conference

Firewalls For Dummies

2003-09-24

what an amazing world we live in almost anything you can imagine can be researched compared admired studied and in many cases bought with the click of a mouse the internet has changed our lives putting a world of opportunity before us unfortunately it has also put a world of opportunity into the hands of those whose motives are less than honorable a firewall a piece of software or hardware that erects a barrier between your computer and those whom might like to invade it is one solution if you've been using the internet for any length of time you've probably received some unsavory and unsolicited mail if you run a business you may be worried about the security of your data and your customers privacy at home you want to protect your personal information from identity thieves and other shady characters firewalls for dummies will give you the lowdown on firewalls then guide you through choosing installing and configuring one for your personal or business network firewalls for dummies helps you understand what firewalls are how they operate on different types of networks what they can and can't do and how to pick a good one it's easier than identifying that perfect melon in the supermarket you'll find out about developing security policies establishing rules for simple protocols detecting and responding to system intrusions setting up firewalls for soho or personal use creating demilitarized zones using windows or linux as a firewall configuring zonealarm blackice and norton personal firewalls installing and using isa server and firewall 1 with the handy tips and hints this book provides you'll find that firewalls are nothing to fear that is unless you're a cyber crook you'll soon be able to keep your data safer protect your family's privacy and probably sleep better too

Flexible Query Answering Systems

2004-06-17

this volume constitutes the proceedings of the sixth international conference on flexible query answering systems fqas 2004 held in lyon france on june 24 26 2004 fqas is the premier conference for researchers and practitioners concerned with the vital task of providing easy, flexible and intuitive access to information for every type of need this multidisciplinary conference

draws on several research areas including databases information retrieval knowledge representation soft computing multimedia and human computer interaction with fgas 2004 the fgas conference series celebrated its tenth anniversary as it has been held every two years since 1994 the overall theme of the fgas conferences is innovative query systems aimed at providing easy exible and intuitive access to information such systems are intended to facilitate retrieval from information repositories such as databases libraries and the these repositories are typically equipped with standard query systems that are often inadequate for users the focus of fgas is the development of query systems that are more expressive informative cooperative productive and intuitive to use

Agent-Oriented Information Systems

2004-05-25

thisproceedingsvolumeofthe5thaoisworkshopisanopportunityforlooking back at ve years of organizing aois workshops what did we achieve with the aois workshop series where were we ve years ago where are we now did ourthemeimpactontheinformationsystems eldinthewaythatwehadhoped for aois workshops have taken place in seattle heidelberg stockholm austin montr eal interlaken toronto bologna melbourne and chicago always in c junction with a major conference on either multiagent systems in arti cial telligence ai mas or information systems is we have tried to innovate in holding these workshops as biconference events each year aois held two wo shop events one at an ai mas conference and one at an is conference as well as using the aois web site as a medium for communication among researchers so certainly we have reached a wide audience of researchers around the world from both the ai mas and is communities but did we also manage to build up a dedicated aois community five years ago we wrote agent concepts could fundamentally alter the nature of information systems of the future and how we build them much like structured analysis er modeling and object orientation has precipitated fundamental changes in is practice of course a period of ve years is too short for evaluating the success or failure of a new scienti c paradigm but still we may observe that while most is conferences meanwhile list agents as one of their many preferred topics agent orientation is generally not considered to be a fundamental is paradigm

Sams Teach Yourself Visual Basic .NET Web Programming in 21 Days

2002

visual basic net will integrate state of the art programming language features including inheritance polymorphism and

garbage collection the book will explain these key concepts in a simple and practical way forms and controls usher in an elegant way to make dynamic web pages the book will cover these topics with how to code examples and projects one of the newest developments in internet programming is the use of xml and the soap communication protocol net services harness these two technologies and will be covered in some of the later sections of the book

Developing and Implementing Web Applications with Visual Basic .NET and Visual Studio .NET

2003

this certification exam measures the ability to develop and implement based applications with forms asp net and the microsoft net framework this exam counts as an core credit toward the new mcad microsoft certified application developer certification as well as a core credit toward the existing mcsd net certification this book is not intended to teach new material instead it assumes that you have a solid foundation of knowledge but can use a refresher on important concepts as well as a guide to exam topics and objectives this book focuses exactly on what you need to pass the exam it features test taking strategies time saving study tips and a special cram sheet that includes tips acronyms and memory joggers not available anywhere else the series is supported online at several sites examcram com informit com and cramsession com the accompanying cd features preplogic tm practice tests preview edition this product includes one complete preplogic practice test with approximately the same number of questions found on the actual vendor exam each question contains full detailed explanations of the correct and incorrect answers the engine offers two study modes practice test and flash review full exam customization and a detailed score report

Cryptology and Network Security

2005-11-24

the concept of content delivery also known as content distribution is be coming increasingly important due to rapidly growing demands for efficient distribution and fast access of information in the internet content delivery is very broad and comprehensive in that the contents for distribution cover a wide range of types with significantly different characteristics and performance concerns including html documents images multimedia streams database tables and dynamically generated contents moreover to facilitate ubiqui tous information access the network architectures and hardware devices

also vary widely they range from broadband wired fixed networks to bandwidth constrained wireless mobile networks and from powerful workstations pcs to personal digital assistants pdas and cellular phones with limited processing and display capabilities all these levels of diversity are introducing numerous challenges on content delivery technologies it is desirable to deliver contents in their best quality based on the nature of the contents network connections and client devices this book aims at providing a snapshot of the state of the art research and development activities on web content delivery and laying the foundations for future web applications the book focuses on four main areas 1 web content delivery 2 dynamic web content 3 streaming media delivery and 4 ubiquitous web access it consists of 17 chapters written by leading experts in the field the book is designed for a professional audience including academic researchers and industrial practitioners who are interested in the most recent research and development activities on web content delivery

Web Content Delivery

2006-01-17

cd rom contains code samples in text bonus material on net framework class hierarchy and tools searchable ebook of this text and programming microsoft visual basic 6 0

Programming Microsoft Visual Basic .NET Version 2003

2004

since the first symposium in 1984 the international symposia on spatial data handling sdh has become a major resource for recent advances in gis research the international symposium on spatial data handling is regarded as a premier international research forum for gis all papers are fully reviewed by an international program committee composed of experts in the field

Providing Semantic Links to the Invisible Geospatial Web

2012

practical linux instruction from the expert who taught you windows there was a time when people asked windows or linux

now it s a question of how to make the most of both linux for windows administrators is an essential resource for anyone working in the real world of enterprise computing inside renowned windows expert mark minasi and linux guru dan york give you practical in depth linux instruction that dovetails perfectly with what you already know about windows it s the best way for you to give your organization the best of both worlds coverage includes understanding linux s strengths and weaknesses understanding linux s differences from and similarities to windows installing and configuring linux administering linux from the command line setting up linux on minimal hardware even a pentium 100 understanding how open source works using samba to make a linux box emulate an nt 2000 file server using nis and nfs to create the linux equivalent of an nt 2000 domain using winbind to make linux recognize windows user accounts tapping the speed and reliability of sendmail configuring linux guis x window window managers and desktop environments modifying and recompiling the linux kernel

Progress in Spatial Data Handling

2006-09-01

this book constitutes the refereed proceedings of the 10th international symposium on string processing and information retrieval spire 2003 held in manaus brazil in october 2003 the 21 revised full papers and 6 revised short papers presented together with 2 invited papers were carefully reviewed and selected from 54 submissions the papers are organized in topical sections on algorithms bit parallel algorithms compression categorization and ranking music retrieval multilingual information retrieval subsequences and distributed algorithms and algorithms on strings and trees

Linux for Windows?Administrators

2002-12-10

this complete guide to setting up and running a tcp ip network is essential for network administrators and invaluable for users of home systems that access the internet the book starts with the fundamentals what protocols do and how they work how addresses and routing are used to move data through the network how to set up your network connection and then covers in detail everything you need to know to exchange information via the internet included are discussions on advanced routing protocols ripv2 ospf and bgp and the gated software package that implements them a tutorial on configuring important network services including dns apache sendmail samba ppp and dhcp as well as expanded chapters

on troubleshooting and security tcp ip network administration is also a command and syntax reference for important packages such as gated pppd named dhcpd and sendmail with coverage that includes linux solaris bsd and system v tcp ip implementations the third edition contains overview of tcp ip delivering the data network services getting started basic configuration configuring the interface configuring routing configuring dns configuring network servers configuring sendmail configuring apache network security troubleshooting appendices include dip pppd and chat reference a gated reference a dhcpd reference and a sendmail reference this new edition includes ways of configuring samba to provide file and print sharing on networks that integrate unix and windows and a new chapter is dedicated to the important task of configuring the apache web server coverage of network security now includes details on openssh stunnel gpg iptables and the access control mechanism in xinetd plus the book offers updated information about dns including details on bind 8 and bind 9 the role of classless ip addressing and network prefixes and the changing role of registrars without a doubt tcp ip network administration 3rd edition is a must have for all network administrators and anyone who deals with a network that transmits data over the internet

String Processing and Information Retrieval

2003-09-29

information modelling is the essential part of information system design design methods specification languages and tools tend to become application dependent aiming at integration of methodologies stretching traditional database design to advanced knowledge bases and including use of logical languages and process oriented system description the topics of the articles in this book cover a wide variety of themes in the domain of information modelling specifications of information systems and knowledge bases ranging from foundations and theories to systems construction and application studies the contributions represent the following major themes the use of ontologies in knowledge modelling concept modelling and conceptual modelling database modelling applications of object oriented modelling view integration and consistency checking modelling multimedia and multimedia models design methods process modelling formal systems

TCP/IP Network Administration

2002-04-04

in the early days of artificial intelligence it was widely believed that powerful computers would in the future enable

mankind to solve many real world problems through the use of very general inference procedures and very little domain specific knowledge with the benefit of hindsight this view can now be called quite naive the field of expert systems which developed during the early 1970s embraced the paradigm that knowledge is power even very fast computers require very large amounts of very specific knowledge to solve non trivial problems thus the field of large knowledge bases has emerged

Information Modelling and Knowledge Bases IX

1998

proceedings of the 30th annual international conference on very large data bases held in toronto canada on august 31 september 3 2004 organized by the vldb endowment vldb is the premier international conference on database technology

Towards Very Large Knowledge Bases

1995

this book examines the problem of relevant query answering over the and provides a comprehensive overview of relevant query answering over streaming and distributed data in recent years applications that combine highly dynamic data streams with data distributed over the to provide relevant answers have attracted increasing attention answering in a timely fashion i e reactively is one of the most important performance indicators especially when the distributed data is evolving the book proposes a solution that retains a local replica of the distributed data and offers various maintenance policies to refresh the replica over time a limited refresh budget guarantees the reactivity of the system focusing on stream processing and semantic it appeals to scientists and graduate students in the field

Proceedings 2004 VLDB Conference

2004-09-17

this book looks at adding artificial intelligence to network like structures from large global networks to small neural like networks the book is mainly a research monograph but also contains blue sky research suggestions and some informative sections areas covered include artificial intelligence soa semantics and xml based query processes

Relevant Query Answering Over Streaming and Distributed Data

2020

this book constitutes the proceedings of the 6th international conference on information systems engineering wise 2005 held in new york ny usa in november 2005 the 30 revised full papers and 20 revised short papers presented together with 18 poster papers were carefully reviewed and selected from 259 submissions the papers are organized in topical sections on mining information retrieval metadata management ontology and semantic xml service method service structure collaborative methodology p2p ubiquitous and mobile document retrieval applications services and e commerce recommendation and information extraction p2p grid and distributed management and advanced issues the presentation is rounded off by 14 industrial papers and the abstracts of 4 tutorial sessions

Thinking Networks

2009

this volume constitutes the refereed proceedings of the 13th international conference on parallel computing the papers are organized into topical sections covering support tools and environments performance prediction and evaluation scheduling and load balancing compilers for high performance parallel and distributed databases grid and cluster computing peer to peer computing distributed systems and algorithms and more

System Administration Guide for MicroStrategy 9. 3

2012-09-30

the seventh international symposium on spatial and temporal databases sstd 2001 held in redondo beach ca usa july 12 15 2001 brought together leading researchers and developers in the area of spatial temporal and spatio temporal databases to discuss the state of the art in spatial and temporal data management and applications and to understand the challenges and search directions in the advancing area of data management for moving objects the symposium served as a forum for disseminating research in spatial and temporal data management and for maximizing the interchange of knowledge among researchers from the established spatial and temporal database communities the exchange of research ideas and results not

only contributes to the academic arena but also benefits the user and commercial communities sstd 2001 was the seventh in the series of symposia that started in santa barbara a dozen years ago and has since been held every two years in zurich singapore portland maine berlin and hong kong by 1999 the series had become well established as the premier international forum devoted solely to spatial database management and it was decided to extend the scope of the series to also cover temporal database management this extended scope was chosen due in part to the increasing importance of research that considers spatial and temporal aspects jointly

Web Information Systems Engineering - WISE 2005

2005-11-04

this easy to read textbook provides an introduction to computer architecture while focusing on the essential aspects of hardware that programmers need to know the topics are explained from a programmer's point of view and the text emphasizes consequences for programmers divided in five parts the book covers the basics of digital logic gates and data paths as well as the three primary aspects of architecture processors memories and i o systems the book also covers advanced topics of parallelism pipelining power and energy and performance a hands on lab is also included the second edition contains three new chapters as well as changes and updates throughout

Euro-Par 2007 Parallel Processing

2007-08-14

this book constitutes the proceedings of the 18th international conference on case based reasoning held in alessandria italy in july 2010

System Administration Guide for MicroStrategy 9. 3. 1

2013-04-30

as a developer you are aware of the increasing concern amongst developers and site architects that websites be able to handle the vast number of visitors that flood the internet on a daily basis scalable internet architectures addresses these

concerns by teaching you both good and bad design methodologies for building new sites and how to scale existing websites to robust high availability websites primarily example based the book discusses major topics in web architectural design presenting existing solutions and how they work technology budget tight this book will work for you too as it introduces new and innovative concepts to solving traditionally expensive problems without a large technology budget using open source and proprietary examples you will be engaged in best practice design methodologies for building new sites as well as appropriately scaling both growing and shrinking sites website development help has arrived in the form of scalable internet architectures

Advances in Spatial and Temporal Databases

2003-05-15

j ucs is the electronic journal that covers all areas of computer science the high quality of all accepted papers is ensured by a strict review process and an international editorial board of distinguished computer scientists the online journal j ucs is a prototype for modern electronic publishing distributed via the internet it supports all the search and navigation tools of advanced online systems this first annual print and cd rom archive edition contains all articles published online in j ucs during 1995 it allows easy and durable access without logging onto the internet uniform citation of papers is guaranteed by identical page numbering and layout of all versions j ucs is based on hyperwave formerly hyper g a networked hypermedia information system compatible with other systems

Essentials of Computer Architecture

2017-01-06

now covers red hat linux written by evi nemeth garth snyder scott seabass and trent r hein with adam boggs rob braun ned mcclain dan crawl lynda mcginley and todd miller this is not a nice neat book for a nice clean world it s a nasty book for a nasty world this is a book for the rest of us eric allman and marshall kirk mckusick i am pleased to welcome linux to the unix system administration handbook linus torvalds transmeta this book is most welcome dennis ritche at t bell laboratories this new edition of the world s most comprehensive guide to unix system administration is an ideal tutorial for those new to administration and an invaluable reference for experienced professionals the third edition has been expanded to include direct from the frontlines coverage of red hat linux unix system administration handbook describes every aspect

of system administration from basic topics to unix esoterica and provides explicit coverage of four popular unix systems this book stresses a practical approach to system administration it s packed with war stories and pragmatic advice not just theory and watered down restatements of the manuals difficult subjects such as sendmail kernel building and dns configuration are tackled head on examples are provided for all four versions of unix and are drawn from real life systems warts and all this book is where i turn first when i have system administration questions it is truly a wonderful resource and always within reach of my terminal w richard stevens author of numerous books on unix and tcp ip this is a comprehensive guide to the care and feeding of unix systems the authors present the facts along with seasoned advice and numerous real world examples their perspective on the variations among systems is valuable for anyone who runs a heterogeneous computing facility pat parseghian transmeta we noticed your book on the staff recommendations shelf at our local bookstore very clear a masterful interpretation of the subject we were most impressed until we noticed that the same staff member had also recommended aunt bea s mayberry cookbook shannon bloomstran history teacher

Case-Based Reasoning

2010-07-10

mcts 70 680 microsoft windows 7 configuring is the perfect study guide to help you pass microsoft s mcts 70 680 exam it provides coverage and practice questions for every exam topic the book contains an extensive set of preparation tools such as quizzes exam alerts and a practice exam while the cd provides real time practice and feedback with two complete sample exams covers the critical information you ll need to know to score higher on your mcts 70 680 exam understand how windows 7 differs from previous versions install upgrade and migrate to windows 7 configure basic and advanced windows networking enforce security with windows firewall and windows defender administer users systems disks and printers manage and safely share files and folders work with windows applications and internet explorer 8 support mobile computers remotely manage windows systems optimize windows 7 system performance efficiently back up systems and reliably recover them cd features 2 complete sample exams the test engine gives you an effective tool to assess your readiness for the exam detailed explanations of correct and incorrect answers multiple test modes random questions and order of answers coverage of each mcts 70 680 exam objective

Scalable Internet Architectures

2006-07-21

as an author editor and publisher i never paid much attention to the competition except in a few cases this is one of those cases the unix system administration handbook is one of the few books we ever measured ourselves against from the foreword by tim o reilly founder of o reilly media this book is fun and functional as a desktop reference if you use unix and linux systems you need this book in your short reach library it covers a bit of the systems history but doesn't bloviate it's just straightforward information delivered in colorful and memorable fashion jason a nunnelley this is a comprehensive guide to the care and feeding of unix and linux systems the authors present the facts along with seasoned advice and real world examples their perspective on the variations among systems is valuable for anyone who runs a heterogeneous computing facility pat parseghian the twentieth anniversary edition of the world's best selling unix system administration book has been made even better by adding coverage of the leading linux distributions ubuntu opensuse and rhel this book approaches system administration in a practical way and is an invaluable reference for both new administrators and experienced professionals it details best practices for every facet of system administration including storage management network design and administration email web hosting scripting software configuration management performance analysis windows interoperability virtualization dns security management of it service organizations and much more unix and linux system administration handbook fourth edition reflects the current versions of these operating systems ubuntu linux opensuse linux red hat enterprise linux oracle america solaris formerly sun solaris hp hp ux ibm aix

J.UCS The Journal of Universal Computer Science

2012-12-06

mining is moving the world wide toward a more useful environment in which users can quickly and easily find the information they need mining uses document content hyperlink structure and usage statistics to assist users in meeting their needed information this book provides a record of current research and practical applications in searching it includes techniques that will improve the utilization of the by the design of sites as well as the design and application of search agents this book presents research and related applications in a manner that encourages additional work toward improving the reduction of information overflow which is so common today in search results

System Administration Guide for MicroStrategy 9.2.1m

2011-12-20

this book addresses key issues for businesses utilizing data communications and the increasing importance of networking technologies in business it covers a series of technical advances in the field while highlighting their respective contributions to business or organizational goals and centers on the issues of network based applications mobility wireless networks and network security provided by publisher

System Administration Guide for MicroStrategy 10

2015-06-04

model view controller mvc is becoming the definitive architecture of website development frameworks due to the stability extensibility and predictability it lends to development it is not just the primary separation of database business logic and interface components but includes a wide range of considerations for building high performing scalable and secure applications deciding which mvc framework best suits the project you are about to begin is one of the biggest challenges you ll face as a developer if you are part of a team this decision has probably already been made for you but in any event you ll need to know how and why the framework authors made it work the way it does pro php mvc looks at the building blocks that make any good mvc framework and how they apply to php it exposes all considerations that many developers take for granted when using a popular framework and teaches you how to make the framework your own over the course of reading this book you will learn the theoretical implications of the choices you would make when writing your own mvc framework and how to put the pieces together in a cohesive package we take a look at the highly modular zend framework how to use its collection of loosely coupled classes to build a unified system we also look at cakephp learning from its automated build system bakery and highly intuitive approach to rapid development this book will lay bare all the secret parts of mvc for you

UNIX System Administration Handbook

2000-08-29

presents a guide to geocaching a type of hide and seek game supported by global positioning system technology reviews the history of the sport and includes checklists a glossary of terms and list of resources

MCTS 70-680 Exam Cram

2011-03-08

this book constitutes the refereed proceedings of the 16th string processing and information retrieval symposium spire 2009 held in saariselkä finland in august 2009 the 34 revised full papers were carefully reviewed and selected from 84 submissions the papers are organized in topical sections on algorithms on trees compressed indexes compression indexing content analysis string algorithms and bioinformatics string algorithms and theory and using and understanding usage
