Innovations in Engineering Education 2003-09-02 engineering education has emerged as a fast developing discipline in itself with universities across the world opening up exclusive departments of engineering education which is also impacting the socio economic system in india most of the engineering institutions in india are part of the hub and spoke university education system unique to india scientifically developing the outcome based curriculum obc uniformly across india has been a daunting task due to the dearth of an authentic book on obc addressing the need of the indian engineering education system this being the first book of its kind in india and with obc serving as the constitution of outcome based education obe it will go a long way to address this need the unique feature of this book is that it is replete with examples to explain the various concepts of planning designing and implementing the obc in engineering institutions different aspects of outcome based teaching learning obtl and outcome based assessment oba are also discussed vividly apart from the examples weaved into the lucidly written seven chapters additional examples and important formats are provided in the annexures another unique feature of this book every engineering ug pg or diploma teacher would be happy to possess a personal copy of this book for 24x7 access which will help to clear their doubts as it arises then and there target audience technical instruction technical teacher trainers curriculum specialists instructional designers education policy makers what the reviewers say the technical education has to adopt outcome based curriculum and there was a dire need of authentic literature which would serve as a base document for scientifically developing obc the book reflects the expertise of both the authors who have more than 30 years of experience in industry and academics in designing and implementing different variants of obc for various technical education programmes such a book will serve as a reference for future generations to avoid re inventing the wheel again and again dr m p poonia vice chairman aicte national institute of technical teacher training and research nitttr bhopal has been spearheading different forms of obc for the last five decades in which the authors have contributed substantially care has been taken such that this book will not only benefit the indian engineering education system but also the engineering teaching fraternity at the international context dr c thangaraj director nitttr bhopal

Biochip Technology 1981 in her 1 nyt bestsellers Brené Brown taught us what it means to dare greatly rise strong and brave the wilderness now based on new research conducted with leaders change makers and culture shifters she s showing us how to put those ideas into practice so we can step up and lead leadership is not about titles status and power over people leaders are people who hold themselves accountable for recognising the potential in people and ideas and developing that potential this is a book for everyone who is ready to choose courage over comfort make a difference and lead when we dare to lead we don t pretend to have the right answers we stay curious and ask the right questions we don t see power as finite and hoard it we know that power becomes infinite when we share it and work to align authority and accountability we don t avoid difficult conversations and situations we lean into the vulnerability that s necessary to do good work but daring leadership in a culture that s defined by scarcity fear and uncertainty requires building courage skills which are uniquely human the irony is that we re choosing not to invest in developing the hearts and minds of leaders at the same time we re scrambling to figure out what we have to offer that machines can t do better and faster what can we do better empathy connection and courage to start Brené Brown spent the past two decades researching the emotions that give meaning to our lives over the past seven years she found that leaders in organisations ranging from small entrepreneurial start ups and family owned businesses to non profits civic organisations and fortune 50 companies are asking the same questions how do you cultivate braver more daring leaders and how do you embed the value of courage in your culture dare to lead answers these questions and gives us

actionable strategies and real examples from her new research based courage building programme brené writes one of the most important findings of my career is that courage can be taught developed and measured courage is a collection of four skill sets supported by twenty eight behaviours all it requires is a commitment to doing bold work having tough conversations and showing up with our whole hearts easy no choosing courage over comfort is not easy worth it always we want to be brave with our lives and work it s why we re here
